

Sound Bonding Application

The Aluminum multi-tabs onto Aluminum electrodes of large capacitor

<Bonding of the Aluminum multi-tabs onto Aluminum electrodes of large capacitor>

Bonding of Aluminum tabs to Aluminum electrodes directly

[Uitex recommended process]
Bonding tabs to electrodes directly to reduce resistance value, and punching for fixing surely.
Uitex SundPower technology can bond anything with the rate of 100%.
After bonding process, punching the electrodes is remained as second process and as usual for feeling safety.(Patented)
